John had a really strange dream last night. He was a dragon. Every day he woke up and he went for his every day walk. After that, he turned at his home and he ate his lunch. One day as he came for his walk, John found a magic tree. This tree can speak and make your wishes. He was very excited who had this opportunity. At that moment a noise woke John up. He understood that this story was a really crazy dream!!

FREIZEIT DEN JUGENDLICHEN IN GRIECHENLAND

Während der Woche ist Ausgehen und Freizeit nicht drin, weil ich in die Schule und in den Nachhilfeunterricht gehe. Ich habe Freizeit am Freitag Abend, am Samstag und natürlich am Sonntag.

Am Freitag Abend, spiele ich mit meinen Geschwister ein sehr spannendes Computerspiele, League of Legends oder gehe ich mit meinen Freunden aus.

Am Samstag mache ich zuerst meine Hausaufgaben und am Nachmittag gehe ich auf den Sportplatz, weil ich

sehr gern Basketball spiele.

Sonntag ist der schönsten Tag! Ich habe den ganzen Tag Freizeit und ich mache viele Aktivitäten. Ich spiele Basketball höre Musik, gehe mit meiner Freundin aus und sehe einen Film.

Allgemein, haben die meisten Jugendlichen hier in Griechenland sehr wenig Freizeit. Sie lernen nicht nur für die Schule, sondern auch für den Nachhilfeunterricht am Nachmittag. Sie haben kaum Zeit für andere Aktivitäten, eigentlich nur am Wochenende.

Die beliebtesten Freizeitaktivitäten sind Computerspiele und sich mit Freunden treffen um in ein Café oder ins Kino zu gehen. Aber wirklich entspannen können sich die Jugendlichen bei uns nur in den Sommerferien, leider...

I like all the sports, but my favourite is basketball. Basketball is played in all the countries but it was played for the first time in Canada. It is played with two teams of five people in a stadium with two baskets. Players must touch the ball only with their hands. The aim of the teams is to put the ball in the basket as many times as they can in 40 minutes. The team, which score more baskets, win. The best player in basket is Michael Jordan.

By Eftihia
C' class E₂

Rugby By Haris

Rugby is a team game and is played with thirty players. Fifteen in one team and fifteen in the other team. Rugby is the third or fourth popular game in world. Rugby is Rugby Union and Rugby League.

The rules are easy. In Rugby Union you always pass the ball behind and to stop the player you must tackle him. When you tackle the player and the player falls down this is called Ruck. In Rugby League when you tackle the player the game stops.

In Rugby you must touch the ball in the Try Zone. This is called try*. The team who put the most tries and conversions win. After the try you kick to put 2 more points.

The best players for me in Rugby:
1) Maia Nonu
2) Rickie Mackaw
3) Kieran Read

LAPTOP

The laptop is a really famous gadget and hundreds of people use it as it helps them and it takes a lot. It has the shape of a rectangle.

We use it to communicate with our relatives from all around the world. We can watch the weather forecast

or listen to different kinds of music. Many people can see and hear the news from around the world and they can watch as well. Finally there are a lot of games you can enjoy and play on the laptop. There are a lot of programmes such as word, excel, access and powerpoint.

It's my favourite gadget as I surf the internet and play games.

AIR POLLUTION by JIM VALARIS

I live in Ather. It is a beautiful city but there a lot of pollution. The most common environment problem is air pollution. The main cause are the factories, dirty cars, planes and ships that produce dangerous gases. The smoke. This is warming the earth.

People can't breathe clean air because they breathe smoke, CO₂ and other chemicals. These gases make our planet hotter. This causes a lot of natural disaster. People and animals may disappear. So, factories should put special filters and people should walk or cycle or use public transport. They should also use cars of new technology or put filters in the cars. Also people shouldn't burn plastic in the fireplaces.

I hope people realise this problem soon and change their habits. Also

Studies in a foreign country - by Katerina Ch.

Over the last years it is common knowledge that a number of students prefer to continue their studies in a foreign country. It is my opinion that this phenomenon has to be stopped due to the fact that it is not so beneficial for the students, young people should not leave their country to support another. This issue strikes a chord with the vast majority of the general public. As far as I am concerned, I would like to analyze the aspects of this issue.

First and foremost, moving to another country requires many years of adaptation, there upon students forget their culture and the way they used to live in their country. In addition to this, both colleges and universities abroad lose a huge amount of money annually. As a result, young people will definitely face difficulties in trying to make a living even though they do not have the appropriate job. Last but not least, people have higher expectations when travelling abroad to study. Not only do they not adapt to the new environment easily, but they also do not turn to anyone for help. Thereupon, the support they need is not truly attained.

Taking everything into account it seems to me that studying abroad is a tendency to be proven ineffective if students are not ready for this change. They will have to be responsible for what they are going to face and, as we all know, nothing is better than working in a familiar environment and having the support that one requires in order to produce the best results.

Brain Drain

by Lydia N.

One of the greatest problems plaguing modern society, is that of "Brain Drain". It is my opinion that there are a lot of ways to stop or prevent this phenomenon from happening. Young people should think twice about leaving their country for a better future. This issue strikes a chord with the vast majority of the general public. As far as I am concerned, I would like to analyze the perspectives of this issue.

First and foremost, "Brain Drain" is a common phenomenon, which takes place in my country, Greece. At a superficial glance, providing new and more job opportunities to all people no matter age or sex, would be an effective way to prevent brain drain. Furthermore, it is undeniable that the government could provide some higher salaries for more qualified people and jobs. In addition to this, there is no denying that my country has some of the best universities in the entire world.

However, many young people still travel abroad searching for better institutes and job opportunities. This is to say that no matter how good the universities of the country are, the economy of the country plays a major role too. Another point worth mentioning is that governments should hire university and college graduates. Last but not least, people from a really young age, must learn how to support their country and never let it down in difficult times.

Taking everything into account, from the above aforementioned, it is my belief that all of us should try hard for our best. "Brain Drain" will disappear soon if people follow some suggestions mentioned. The prospects for the future will be break unless the government takes some measures to offer better job opportunities to the young. The burden of responsibility lies in the hands of government to make the appropriate decision.

"A gadget every teenager needs to have"

Nowadays every teenager needs to have a phone on his own to make his life easier.

Have you ever thought of being somewhere and needing to communicate with someone immediately? Only with a phone you can text a message or call somebody very quickly, whenever you like.

Moreover, a phone can be better because you can carry it and it doesn't take up place in your bag. In addition, you can see videos, download music and apps.

Some people like phones more than other gadgets, also teenagers believe that having a phone is very cool since you can use it to everything.

I regard this as the most useful gadgets because it is valuable and it is also a part of our life.

FOREIGN LANGUAGE by Ervin T.

Have you ever thought how important is to know a foreign language? From my point of view, it is very essential and there are many ways to learn one.

To start with, the most common way of learning a language is by attending a class. For example you can look for a school which suits you and then join in for some lessons with qualified teachers who will help you achieve your goals. Another method is by taking private lessons. For instance, you can find a teacher and then have lessons yourself. Apart from this, you can learn a language by reading some books. Although this will gradually increase the level of your knowledge, it is not as popular as the other two methods.

As I said, learning a foreign language is a great tool for everyone's future. For example, you have better career prospects as you have more qualifications. Furthermore, speaking a language helps you when you travel abroad, as you can communicate with locals.

To conclude, it is generally believed that everybody should know a foreign language. So, why don't you give it a try?

I think that tablet is the most useful gadget for teenagers. These are some reasons for my choice.

You can take it everywhere and you can find information wherever you are. Tablets aren't so expensive, so everyone can afford to buy them. Also tablets have got bigger screen than mobile phones so you can see better. Tablets may have got more Giga Bytes ~~so~~ you can download more apps if you wish. You can also find a great variety of tablets available which have got a good screen and can't break easily.

Well in my opinion tablets are better than mobile phones and I think that all teenagers must have one. They are value for money and it can live up to all of your expectations.

Technology in our life

Date

Technology has been in our lives for a few years now. It has changed our life and it helps us on a daily basis.

Most of us have gadgets in our home and we are very interested in them. Electronic devices such as washing machine and cooker have made our housework much easier.

The most useful gadgets for me are the mobile phones, tablets and computer and we all love them, don't we?

The vast majority of teenagers use gadgets more than anyone else in our world. Teenagers want to have the latest technology in their hands and they spend their whole day playing on their tablets. Also they are able to use the most high-tech things really well.

However, sometimes gadgets and technology generally keeps us behind and we tend to lose touch with our friends and have a gap time. Unfortunately, we prefer talking to them on Facebook to talking to them in person. We usually talk with them by Messenger, Viber and other applications and the media, which do not cost anything at all.

Moreover, technology has caused lots of problems since misunderstandings happen all the time.

In conclusion, I believe that we must use all the technology and gadgets wisely. It isn't worth remaining stuck to your PC and don't have whole of time.

Techno-teens

Are you a teenager obsessed with technology? If you are then you probably have to keep on reading and learn how useful a laptop is, in my opinion.

First of all, you can carry it anywhere - it can be carried very easily. All you need is a bag. It has the right size so it isn't tiring for your eyes. You can also carry out any kind of research and find information about every single thing. In addition, you can order many things from websites after you confirm their society. This might not always be effective but you should give it a try.

Furthermore you can find laptops at really affordable prices as well as being of high quality. Via a laptop you can entertain yourself and enrich your knowledge. But remember; the more you play computer games, the worse it is for your eyes.

To sum up, I believe that laptops play an important role in our life nowadays and it's the best high-tech gadget since it provides us with everything we need.

Overweight teenagers.

Many teenagers are overweight in my country because, as it is known, they prefer fast food to home made food.

Teenagers in my country don't usually prefer eating homemade food as they say it's either tasteless or they don't like it for that reason, when they go out, they buy fast food such as hamburgers, sweets, candies etc. So, either they don't know how harmful they are or they don't want to admit the truth.

Fast food can cause many health problems and obesity is one of them. Some other problems are high cholesterol levels and damage to the stomach. Some teenagers, when they try to forget their problems, eat sweets and fast food which is very bad for them.

In my opinion, fruits and vegetables can be as tasty as fast food and much healthier. I wish people preferred homemade food to fast food.

TECHNOLOGY IN A TEEN'S LIFE

You always wonder which is the most popular gadget that no modern teen should be without. Well we carried out a survey and 82% of the teens we asked answered mobile phone.

It's very useful because, due to technological development, you can use a mobile phone to listen to music, download and use apps, take photos, shoot videos, have video chats and of course use it for the reason it was originally made, to call people who are far away from you. It makes your life easier because you can also view a calendar where you can plan your day. Mobile phones come out in different brands, shapes, sizes, colours with different capabilities.

It wasn't so popular in the past because you couldn't do anything more than just calling other people who were in close proximity. Nowadays, the mobile phone are getting more and more popular. In the future, mobile phones will definitely become even more multi-purposed.

All in all, a mobile phone is a gadget everyone should have because you can call for help in case of emergency and it can make your life easier if you use it wisely. If only everyone could have a mobile phone!

My favourite sport

My favourite sport is swimming. Swimming is a very good individual sport. We have races and I have a lot of stress. I end out of the five first. I have a lot of stamina so my coach puts me swimming for a lot of metres. Actually I, think that swimming is the best sport and the most important for me. I'm very good at it and I would like to be good at swimming for all my life. Swimming is all my life. I wish some day I could go to Olympic Games

By P. Aristea

Extreme Ironing

Extreme ironing is an extreme sport in which people take ironing boards to remote locations and iron items of clothing. According to the extreme ironing Bureau extreme ironing is the latest danger sport that combines the thrills of an extreme outdoor activity with the satisfaction of well-pressed shirt. Part of the attraction and interest the media has shown towards extreme ironing seems to center on the issue of whether it is a sport or no. It is widely considered to be tongue-in-cheek. Some locations, where such performances have difficult climb; a forest; in a canoe; while skiing or snowboarding; on top of large bronze statues; in the middle of a street; under water; in the middle of a motorway during a keirin race; while parachuting and under the ice cover of a lake. The performances have been conducted solo or groups.

"Aesop's fable"

A FUNNY STORY

When I was 7 years old I went on holiday with my family. We went to a park. That park could open only with dogs and no cats. Anyway, then I had a cute cat. Frankly, she was so nice. When we went to the park all the dogs saw my cat and they started to chase her.

A FUNNY STORY

One day I was in a big forest and I saw a giant and a castle. The giant carried a queen back to a dark cave. The queen was scared. A handsome and brave knight came to the dark cave and fought with the giant and his dragon. The giant won and the queen was very sad. The queen tried to fight with the giant. Finally, she won and she saved the knight.

LAZER

A little gadget that I have is lazer. It's a very small gadget but it has got two functions, the laser geam and the flashlight. The laser beam is the main function. I think and I use it to see something that is far away from me or to play with the cats because they chase it. The flashlight is the second function and it's used to see better daces.

PSP

My favourite gadget is PSP. It's like a smathphone but it has buttons so we can choose our game mode, our characters or move the character when the games start. It also has an ON/OFF button, reset button and pause. It has four other buttons (l1,l2,r1,r2) that they help you when you play. Moreover, you can take photos, which you can make as you wish.

I like it because I can do all these things.

Technology helps people a lot in their life.

Teenagers use mobile phones, computer and other gadgets on a daily basis.

Sometimes technology causes problems. Some people argue for stupid things and there are misunderstandings. We must be more careful with technology.

Anyway, we must use it well so not to be in danger and have fun.

The rubbish

Mary
Mosc
B Class

My city has got a problem!

Everyone throws the rubbish away on the street!
and pollute the environment. Some people
recycle paper, metal, and plastic.

Everyone should collect the rubbish and put them in
the bin. Please help my town! And stop
polluting it!

We can stop the pollution and convince
the people to stop throwing the rubbish away on
the street!

Middle Ages – by Sia K.

The Middle Ages is one of the most important historical periods and my favourite. I would like to go for a visit by travelling there back in time.

First and foremost, the Middle Ages were said to be fascinating. For example, there were no rules for you to follow and you were free to do what you wanted. Personally, I would be happy enough to have had a king or queen to admire such as then. Also, the fatal injuries were lower. As a result, people were safer and healthier. For example, there were no streets full of cars and dangers but horses and other animals that helped you get to your destination.

In Middle Ages the people were more friendly and open-minded than today. One reason why I would choose to visit that time period is the environment and people, were peaceful. Furthermore, I would strongly say, that I loved their clothing and I would like to be able one day to give them a try. Lastly, what I most admired in that period were the martial arts.

To sum up, the Middle Ages were in my opinion the most amazing historical period and I would like to visit them.

Totos comes back home from school and he cries.

What's wrong? Why are you crying?

His mother asks.

The teacher hit me.

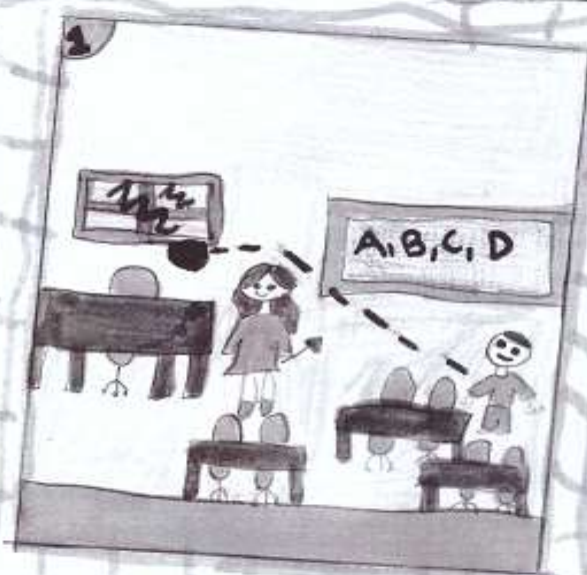

Why?

Because I answered a question that nobody else could answer.

What? Didn't you get A (excellent)?

That was the question?

Who broke the window?

THE AIR POLLUTION

The air pollution is bad for the people and animals because some of them die.

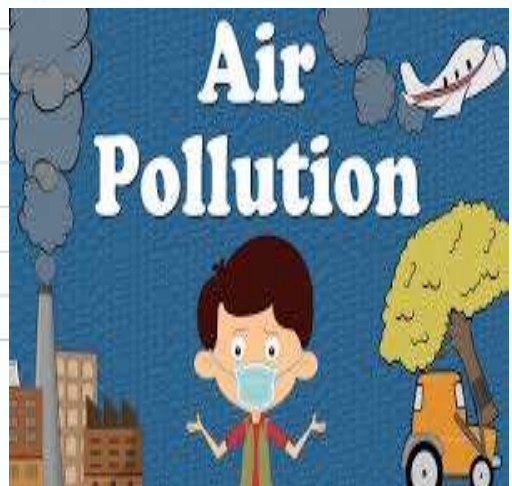

The air pollution caused by people because they are throwing away rubbish in the streets and because they made factories and they pollute the air with toxic gases.

So with that a lot of animals die and the whole world is getting more toxic. We should probably save electricity by making more and bigger solar panels or we should make factories use filters not to pollute the air.

We hope for a better future without toxic gases.

FOREIGN LANGUAGES by Nick Ap.

Nowadays, learning a foreign language is a must for your everyday life. It is a task that it will not only help you improve your knowledge so that you understand people from other countries, but it will also give you many new opportunities for your work and future arrangements.

Learning a foreign language can be a little difficult as there are some languages that are really hard to understand or might cost a lot of money for private lessons. Although if someone has a goal to master a particular language they can do it. There are a lot of schools that teach foreign languages and the teachers are professionals with really high standards.

Now, there are a lot of useful ways to practice and use your foreign language and the most practical way is through your job. It is much easier for a person to close a deal with a Chinese company if he know Chinese than when he doesn't.

The value of a foreign language is uncalculated because it is the symbol of a country and its most useful and important tool.

Tell jokes

Class: B

- I've read so many horrible things about drinking and smoking recently that I made a new firm New Year's resolution: NO MORE READING!
- Husband: "Wow, honey, you look really different today. Did you do something to your hair?"
Wife: "Michael, I'm over here!"
- Famous last words of a post man: What a lovely day back
- Mother: "How was school today, Patrick?"
Patrick: "It was really great mum! Today we made explosives!"
Mother: "Ooh, they do very fancy stuff with you these days. And what will you do at school tomorrow?"
Patrick: "What school?"

SMARTPHONE

Smartphones look like tablets but they are smaller than them and they have a smaller screen too.

Smartphones have got a lot of uses. People usually use smartphones to call other people, some others use it to play games or to listen to music. People use smartphones to see videos on YouTube, search something through Internet too.

I use mine to call my friends. When I am bored and I haven't got anything to do I use it to listen to music. That's why I like it.

Summer VACATION 2016

Last summer, my vacation started in July at the camp at the Ranch.

I stayed at the house at New Orleans 2-2. I went with my friends Sofia and Dimitra.

In August, I went to Kefalonia with my family and my cousins. Every day we ^{swam} at the sea and had fun. At evening we walked and ate ice-cream.

We found lots of sea urchins. At the end of my vacation we went to Nafpaktos. It was great!!!

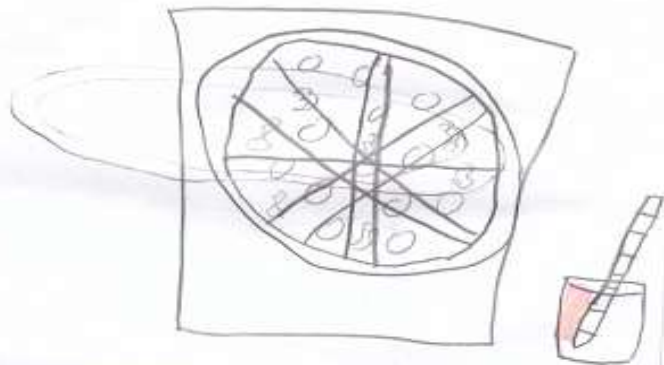

There was a swimming pool.
